

These big companies are blocking access to their networks and stopping competition before it can even begin for local, long-distance, the Internet, cell phone services, and new technologies like making calls over the Internet. If these mergers go through, we could end up with only two companies controlling the market. That's not the free market in operation. The FCC should block these mergers and find new ways to bring down the costs of services, particularly high-speed Internet which has become so important. America is falling behind the rest of the world. This merger would only worsen these problems. Please stop it.
